

YOU CAN BE A PARTNER FOR CHANGE

Dear Patient:

You and I have a special relationship, but unfortunately, there is too much interference from health insurance companies, legislators, and the media. Not only does this interference have the potential to impact your care, but it also impacts your satisfaction with the health care system, my own professional satisfaction and, at times, access to the care that I know is best for you.

Montgomery County Medical Society has initiated a new service, the **Patient Action Network (PAN)**, which is a program that will enhance the partnership between patients and their physicians through education, collaboration, and action on important healthcare issues.

Every day, patients like YOU face challenges receiving the care they need such as:

- **Rising insurance premiums**
- **Rules imposed by insurance companies**
- **Difficulty understanding complex insurance regulations**
- **Prior authorization requirements**

When you sign up for PAN, you will become better informed and empowered to take action. Once you join PAN you will receive updates and alerts as well as articles about important issues affecting your medical care.

For more information, please visit our website: www.montgomerymedicine.org/pan
